🚩 ACADEMIC ACHIEVEMENTS

Smart Cyber threat detection System

Developed a real-time cyberthreat detection system using AI/ML to analyze network traffic, detect anomalies, and classify threats with high accuracy.

Fake Social Media Account Detection

Secured 2nd place in a college hackathon for pitching a software solution to detect fake social media accounts, under the Blockchain & Cybersecurity theme.

Home Automation System

Developed a Home Automation System to control and monitor appliances remotely, integrating hardware with software for smart home functionality.

🚀 SKILLS

AWS · C/C++ · Java · Docker · EJS · Git · GitHub · HTML · CSS · JavaScript · Linux · MongoDB · Python · React · S3 · SQL · Node.js · Express.js · Data Structures and Algorithm

🎓 EDUCATION

Aavishkar Academy School
X (ICSE)
04/2021

New Horizon PU College
XII (PUC)
04/2023

Garden City University
Bachelor of Technology
- Pursuing B-tech in Information Technology

👤 SUMMARY

A Bachelor of Technology student deeply passionate about IT and software engineering. Proficient with Git/GitHub workflows, Linux environments, and containerization with Docker, this individual excels at crafting scalable, intuitive applications that drive user engagement and streamline workflows. Always curious and committed to continuous learning and embrace industry best practices and emerging technologies to deliver reliable, high-impact solutions.

👥 EXPERIENCE

Springevening Private Limited
Trainee
07/2024 - 08/2024
- Completed a one-month online training at Springevening Pvt. Ltd., focusing on web development fundamentals and practical project experience.

CODTECH IT SOLUTIONS
Intern
03/2025 - 05/2025
- Completed a remote internship at CODTECH IT SOLUTIONS, delivering four full-stack web development projects from start to finish.

📄 PROJECTS

ClipSync
- A MERN-powered microlearning platform for bite-sized educational videos—featuring AWS S3–backed media storage, one-click Google & Microsoft OAuth, and an Instagram-inspired feed with real-time likes, comments & follows.
- 🔗 https://github.com/gaurav-048-sharma/ClipSync.git

LearnStream
- Built an online learning platform with video lessons, quizzes, and progress tracking for an interactive learning experience.
- 🔗 https://github.com/gaurav-048-sharma/learnstream.git

Airbnb Clone
- A simple Airbnb clone built with MongoDB, Express.js, Node.js, EJS and vanilla JavaScript, featuring user auth, property listings, search filters and a booking system.
- 🔗 https://github.com/gaurav-048-sharma/Airbnb_Project.git

Uber Clone
- Developed a modern Uber clone using the MERN stack with real-time cab booking, location tracking, and responsive UI for seamless user experience.
- 🔗 https://github.com/gaurav-048-sharma/uber.git

Chat Application
- Built a real-time chat application using the MERN stack with socket-based messaging and user authentication.
- 🔗 https://github.com/gaurav-048-sharma/Chat-App.git
